

# ENVIRONMENT POLICY

GrainCorp

GrainCorp's mission is to be an international leader in food ingredients and agribusiness, creating value by connecting consumers to growers along the grain chain. Our vision is to grow as our customers' preferred partner, driven by our passionate people and assets around the world.

Sustainability to GrainCorp means doing business in a way that cares for our people, our communities and the environment, while ensuring we are here for the long term. As a business involved in agriculture and food, we recognise that we are deeply connected to the health of the land and ecosystems. We are committed to minimising our environmental impact and stewarding the resources of the earth for future generations.

Our aim is to minimise the environmental impact of our operations through commitment to:

- Pro-actively assessing, monitoring and managing environmental impacts, risks and incidents while complying with regulatory requirements.
- Improving GrainCorp's resource efficiency, and addressing waste and pollution.
- Maintaining Environmental Management Systems which are aligned with recognised international standards.
- Establishing and regularly reviewing environmental objectives and targets to continually improve the company's environmental performance.
- Sharing the Environmental Policy with everyone working for, and on behalf of GrainCorp, and ensuring they are aware of their environmental responsibilities.
- Ensuring ongoing oversight and review at the highest levels.

The GrainCorp Managing Director & CEO, the Executive Leadership Team and all levels of management are responsible for implementing the Environmental Policy. We believe this policy reflects good business practice and enhances GrainCorp's economic, social and environmental sustainability.

Mark Palmquist  
Managing Director & CEO
